by CRISTINA RADOVAN

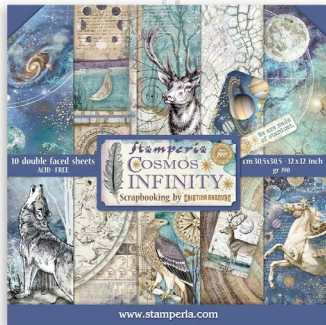

*Infinity is the continuation of Cosmos. It is more about the Universe but it is still linked to the earth. Cristina Radovan is guiding us in the research of harmony with new colours, shapes, concepts and special effects.*

## Crackle Paste

The special formula of one-component crackle paste, now also in the metallic version, allows you to quickly enrich any project. The cracks are formed in about 6-8 hours. With the help of the hairdryer the drying time is reduced to 20 minutes. Suitable for porous surfaces.

## Crystal resin

Crystal Resin is suitable for any non-porous surface. Paper and wood need to be sealed first with a varnish or Mix Media glue to ensure that it does not seep into the object or paper which will go translucent if not protected. The work surface needs to be absolutely flat as this is a self-levelling product.

## Patina Anticante

This is a special paste which can be easily applied and removed. By using a cloth it is easy to obtain the desired effect. It is ideal to highlight the crackle slits and to "age" a creation without difficulty. The colors "Ombra" and "Bianco" are specifically suggested to create shadow and light effects on three-dimensional reliefs.
